## PROJECTS

- **Title:** EMPLOYEE MANAGEMENT SYSTEM [View Project](#)  
**Technologies used :** Core Java, J2EE Technologies (JDBC, Servlets, JSP), HTML, CSS, Bootstrap, Oracle (SQL).  
**Description:** Developed an Employee Management System to manage employee data efficiently. The system includes features like adding, updating, deleting, and viewing employee records. It integrates with an Oracle database for data storage and retrieval, and uses JSP for the front-end interface.  
**Role:** Designed and implemented the backend logic using core Java and J2EE technologies, and developed the front-end using HTML, CSS, and Bootstrap.
- **Title:** Portfolio Website [View Project](#)  
**Technologies used :** HTML, CSS, Bootstrap, Git, GitHub  
**Description:** Created a personal portfolio website to showcase projects, skills, and certifications. The website features a responsive design for seamless viewing across devices, highlighting technical expertise and professional achievements.  
**Role:** Developed the complete front-end layout and design using HTML, CSS, and Bootstrap.
